# Take control of your business

JCurve Solutions is a cutting-edge application that fully integrates your front and back office operations (including CRM, E-Commerce, Inventory, Financials and Reporting). It is the first "all-in-one Business solution" for Small Businesses, powered by NetSuite, the No#1 business software suite on the planet.

The software itself is web based: **you can access it anywhere and anytime**. It is accessed via a simple one screen dashboard that can be customised to suit your specific business operation. And because it is compatible with your existing system, the transition is easy and fast to give you immediate benefits.

- JCurve Solutions is scalable to grow with your business
- Enjoy the power of big business software at a very competitive price
