

Business Analyst / Project Manager

JCurve Solutions' cloud-based Telecommunication Expense Management Systems (TEMS) streamline and proactively manage voice and data over both fixed and mobile services, helping to control and reduce costs.

JCurve Solutions is currently seeking an experienced Business Analyst with Project Management experience to effect a new generation of product, replacing and extending functionality.

The role will work closely with the Product, Development and Service teams to capture and validate a comprehensive set of business and functional requirements.

Included responsibilities include:

- Discovery and documentation of functional requirements from service delivery, support and customers
- Perform detailed analysis to determine product replacement and extension requirements
- Detailed investigation into specific business requirements
- Validation of assumptions
- Keeping track of issues / improvements
- Engaging partners and customers to determine direction and solicit feedback
- Documenting feature / chore requirements and ensuring development team has access to latest knowledge and requirements
- Engage with internal and external stakeholders
- Work with Development to define test plans and use cases
- Knowledge of Agile processes
- Prepare project plans and identify critical paths
- Weekly and monthly report of progress.

Skills & experience required for the role include:

- At least 5 years experience in a similar role
- Strong analytical skills
- Thorough working knowledge on all aspects of the SDLC
- Strong verbal and written communication skills
- Strong organisational skills and proven ability to work under pressure.

How to Apply?

Send your resume, a short introduction and the details of the position or area for which you're applying to hr@jcurve.com.au - we look forward to hearing from you!
