

# Go Live Essentials

## The fastest way to grow your business

### Get the proven approach to success.

Grow your business faster with the end-to-end small business Cloud ERP solution designed specifically for wholesale distributors.

JCurve's **Go Live Essentials** offers a rapid rollout of our Cloud ERP that's super fast, non-disruptive and accelerates value from Day 1.

Transition from your existing systems within 8 weeks from project kick off.

### Go Live Essentials gives you:

- Full visibility across the business to reduce inefficiency, drive results and scale
- Hundreds of hours of industry best practice built into the system
- A decade of expertise across hundreds of wholesale distribution deployments delivered to drive value on Day 1
- 100+ pre-built reports, dashboards and pre-configured roles providing business intelligence metrics

It's rapid, it's proven and it will accelerate your business.

Minimise business disruption

Reduce lengthy implementation cycles

Avoid ballooning costs

We needed a solution that would integrate and optimise our operations, allow our workforce to be more flexible, scale as the company grew and offer cloud based cost benefits by eliminating the need for servers and updates.

Emma & Toms

## Race ahead of the competition

JCurve has a deep understanding of the challenges you face. We see wholesale distributors who are struggling to keep up — especially those still relying on outgrown or disparate systems. They are hampered by challenges such as:

- Decisions made on unreliable data
- Poor inventory utilisation
- Under performing sales
- Inefficient and inaccurate order and inventory management
- Wasted time spent on manual processes that cannot scale

As a wholesale distributor, your success relies on your ability to adapt and scale. You need a proven solution that can rapidly accelerate your business — to “Go Live” as quickly as possible, with minimal downtime.

## Strong Foundations for Transformation

- Detailed process flows
- Pre-defined roles to jump start business activation
- Real-time Dashboards and KPIs
- Turnkey set up and training

A recent study showed stunning improvements for wholesale distribution companies who switched to NetSuite, the #1 Cloud ERP:

- Actionable Business Insights + 50% to 80%
- Gross Margin Performance + 1% to 5%
- Revenue Performance + 2% to 10%
- Inventory Costs – 20% to 30%
- Obsolete Inventory Carrying Costs – 20% to 30%
- Customer Backorders – 60% to 80%
- IT Resource Costs – 50% to 75%

JCurve is the Small Business Partner of NetSuite in Australia and New Zealand.

## A phased approach to deliver real-results, in record time

### Phase 1: Modernise

Quickly deploy JCurve Cloud ERP

- Set up and go live user training of key functional areas including inventory management, accounting, sales management, CRM, dashboards and reporting
- Standard Essentials Statement of Works
- Dedicated Project Manager

### Phase 2: Transform

Eliminate inefficiencies of disparate inventory, accounting, CRM and other systems

- Grow further with additional customisation and advanced functionality including marketing, sales and supply chain, B2B and B2C eCommerce website build or integration

### Phase 3: Innovate

Provide excellent customer service at all touch points across sales, support, service, delivery and fulfilment

- Continue to customise workflows and automation of processes, partner relationship management, client and vendor centres and further in-depth business intelligence
- Integrate industry specific third party solutions

Phases 2 and 3 to be scoped separately subject to business requirements.
